

SE **M**ANA DE LA CIENCIA **2019**

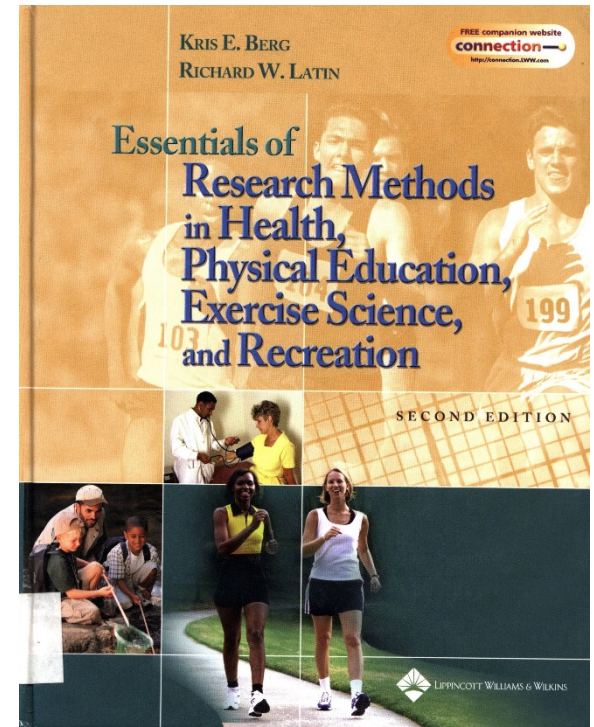

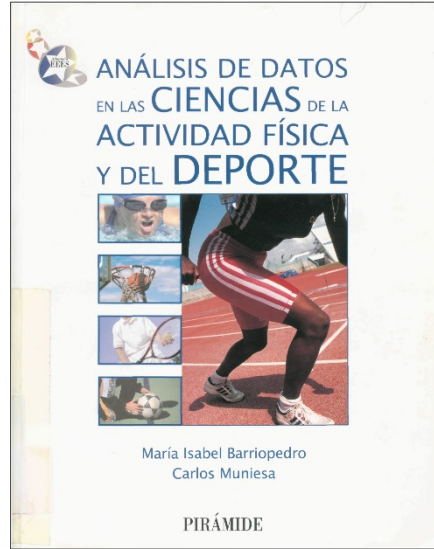

EN LA

BIBLIOTECA DEL INEF-UPM

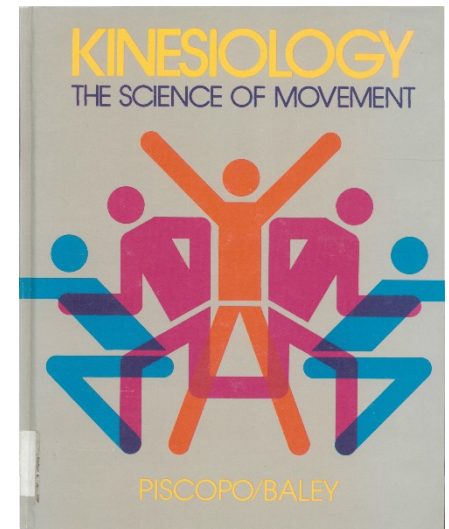

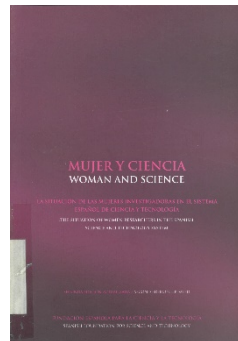

La ciencia está presente en el deporte. Para ilustrar esta relación, en la Semana de la Ciencia 2019 desde la biblioteca queremos presentar como curiosidad una muestra de nuestros libros de actividad física y deporte que presentan el término ciencia en su título.

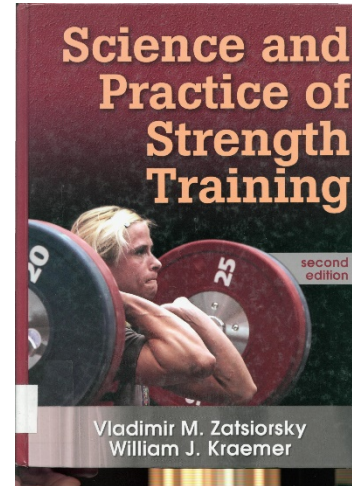

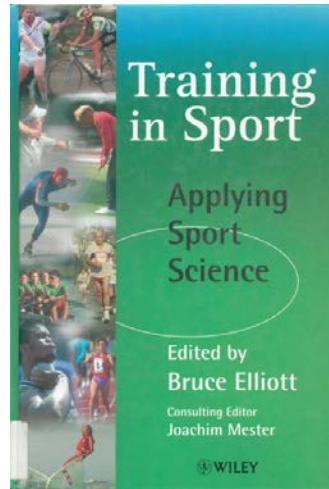

Son libros de distintas épocas, lenguas y lugares.

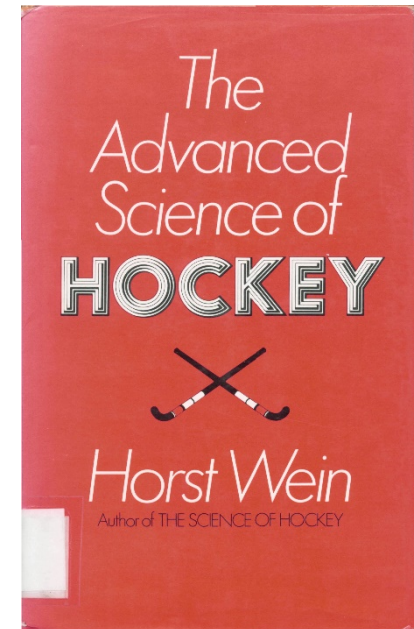

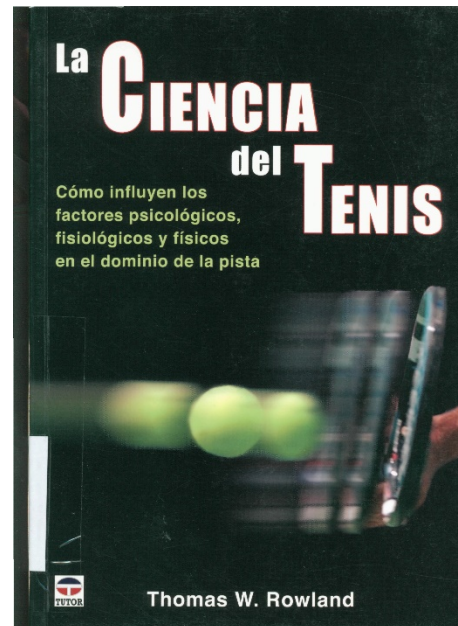

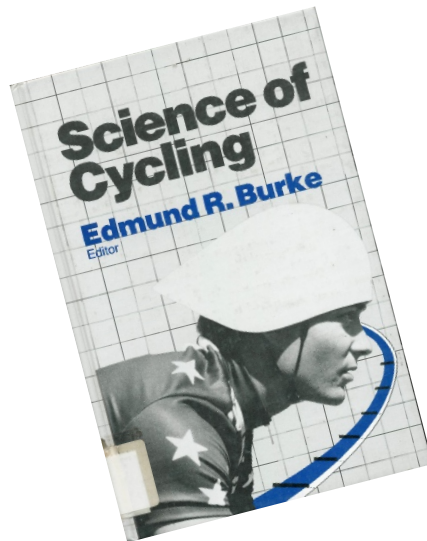

Tratan las ciencias del deporte en general, o desde puntos de vista específicos.

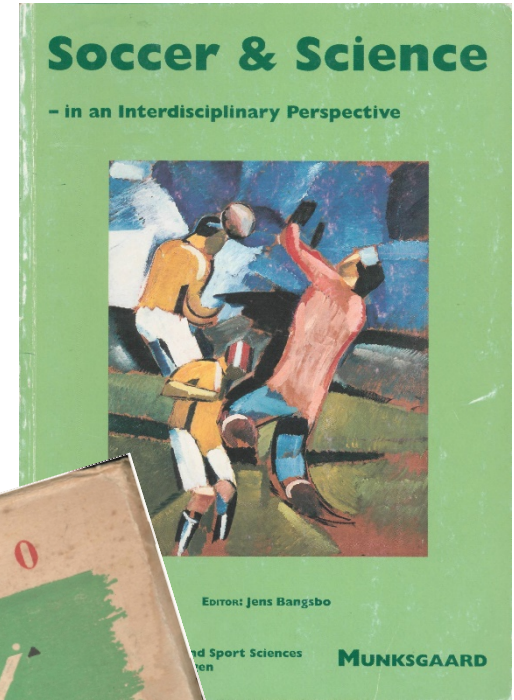

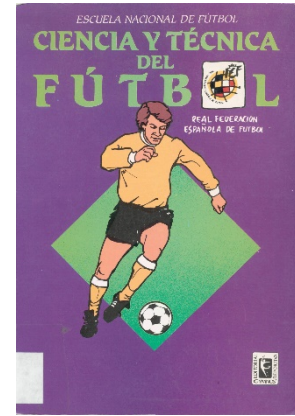

Versan sobre el entrenamiento...

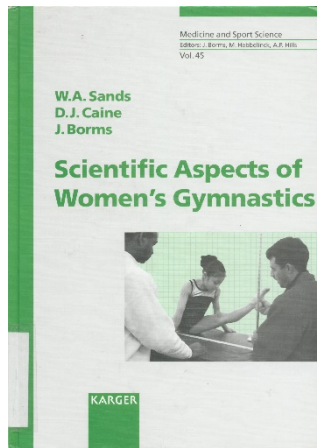

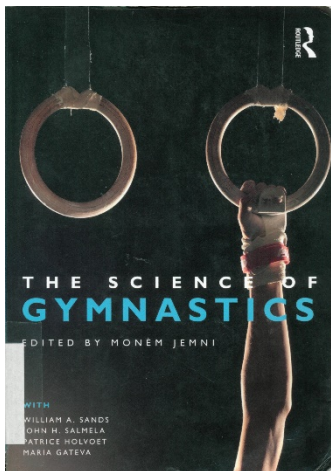

... y sobre actividades deportivas concretas como ciclismo, tenis, hockey...

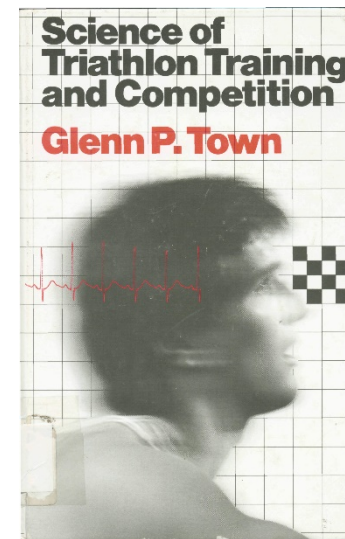

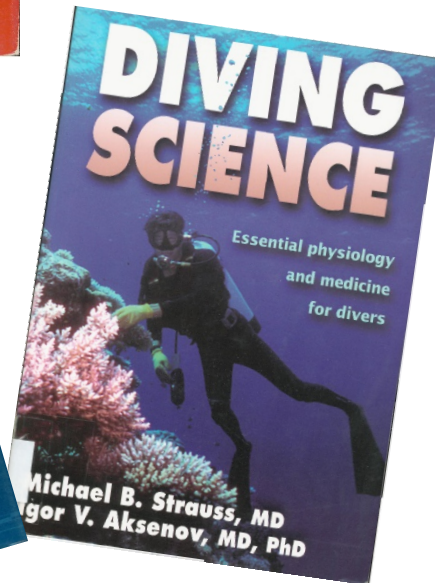

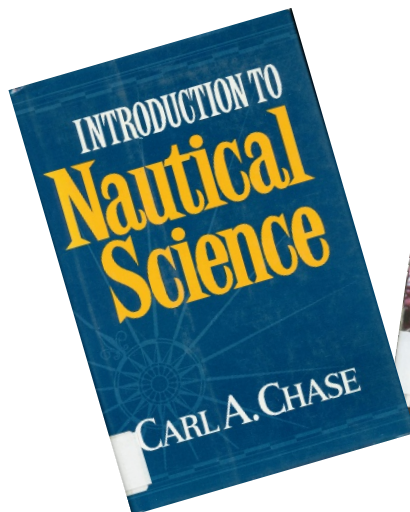

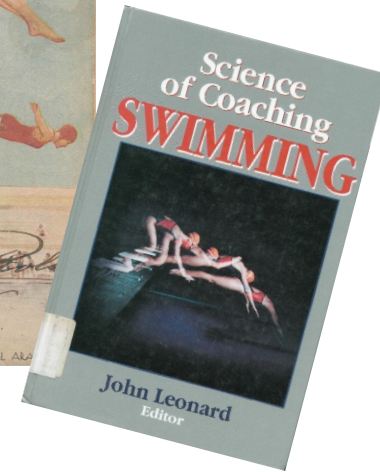

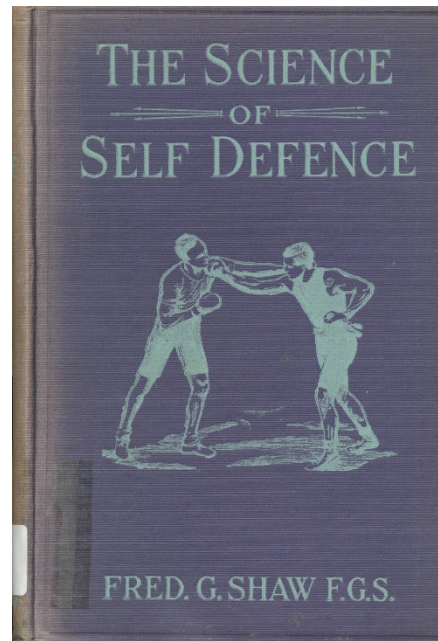

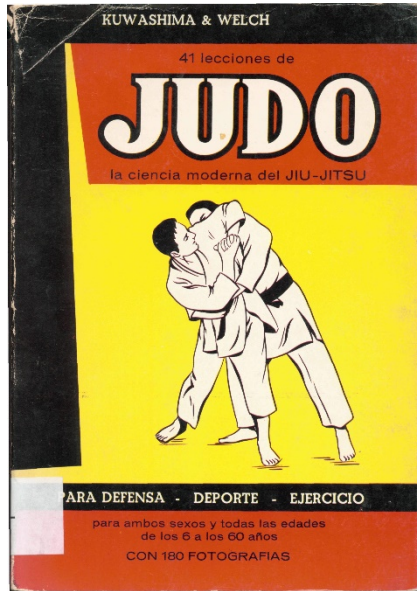

La gimnasia

El fútbol

Los deportes de combate

Los deportes acuáticos y náuticos o el triatlón.
